Home Features Members Targeting How Works About US

"The new way to monetize any talent or possessions you've got. And to navigate your way through life. Go ad free online; get paid to view ads, or get paid to even advertise depending on how valuable you find your ad to be to the viewer. We also provide merchant accounts with VERY low fee for those who choose not to transfer to another financial institution."

Screen 1

Achievements (Live Total Counts)

App / OS Monetization: 22.55 M
Wallet Transfer & Withdrawal: 22.55 M
Searcher/Surfer Actions Taken: 22.55 M
Active ads (Ads Being Served): 22.55 M

Live counters will display respective numbers of count.

Random 3 products will be selected to display.

Random 3 services will be selected to display.

Random 3 users/members will be selected to display.

Every 2 screen I've placed sign up buttons to inspire user's to create account.
It'll contain text according to previous contents to attract users.

Create Advertisement

Dear Member,

"Go For It Pass" team appreiate your affords in the world of digital market.

message.....

You're just one step ahead to create advertisement. You will be asked some information about your advertisement which can be editted at any time you want.

If you don't have enough information about your idea, don't worry just proceed with flow you'll find this advertisement on draft board with advertisement list.

At the end of all information you'll find "Activate This Advertisement" button, click that button to activate/run this advertisement. When you'll request for activation, this advertisement will be sent to the administrator for review content that may take 2 working days to be reviewed and activated. You will receive notification about review from administrator.

If They found someting wrong they'll reject but don't worry you'll be assisted by them to improve advertisement. You've to edit and send request for activation again.

Click on continue button to proceed.

Continue

When user'll select create advertisement link, this page will be displayed.

This page contains create advertisement wizard that will ask all available options for selected type.

"Create Advertisement" wizard will allow user to create advertisement through simple steps.

User'll be asked some simple questions related to advertisement which user can modify any time.

Heading of the this wizard will be changed according to content/data asked.

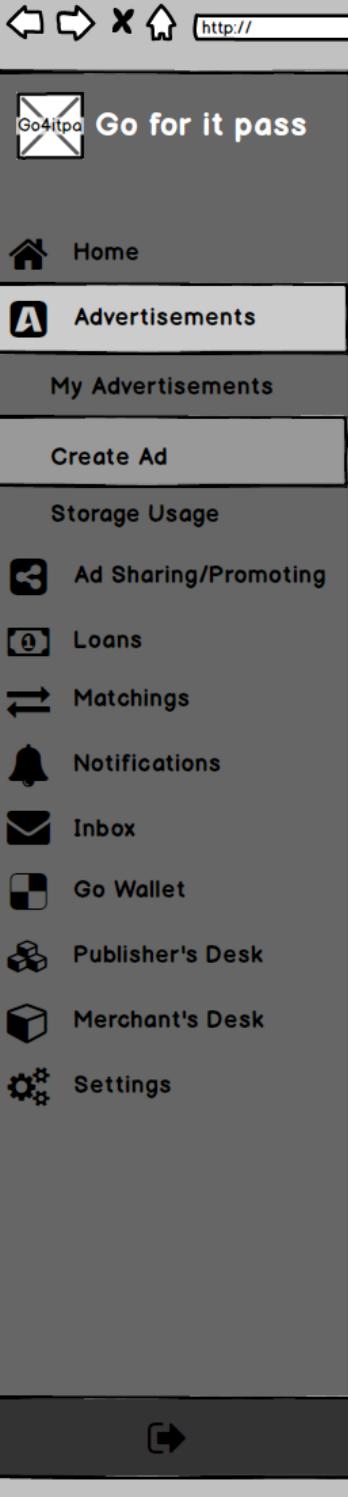

Progress bar will be filled according to steps completed.

Content and navigation button will be changed accordingly.

This wizard will navigate steps smoothly on same page and allow user to move further and backward for modification in choices.

"Continue" button will display next page and start asking data for drafting advertisement.

User can edit it anytime by editing drafted advertisement.

Create Loan Advertisement

Dear Member,

"Go For It Pass" team appreiate your affords in the world of digital market.

message.....

You're just one step ahead to create loan advertisement. You will be asked some information about your advertisement which can be edited at any time you want.

If you are creating an advertisement which will ask for loan (Consider as an Loan Application), you've to get minimum 50% positive vote out of 1000 votes. If you want to edit this ad, vote count will start from 0 again.

If you are creating an advertisement which will represent loan scheme to borrower, it'll appear as a search result.

Both will be activated only after approved by administrators.

Click on continue button to proceed.

Continue

"Continue" button will display next page and start asking data for drafting advertisement.

User can edit it anytime by editing drafted advertisement.

"Create Loan Advertisement" wizard will allow user to create loan advertisement through simple steps.

User'll be asked some simple questions related to advertisement which user can modify any time.

Heading of the this wizard will be changed according to content/data asked.

Progress bar will be filled according to steps completed.

Content and navigation button will be changed accordingly.

This wizard will navigate steps smoothly on same page and allow user to move further and backward for modification in choices.
